SOVR Vault Tokenization & Real-
Time Flow Ledger

Gustavo Maldonado

Founder of SOVR Empire | Web3 Vault Architect | Trust Law
Strategist | Real-Time Payment Systems | Builder of Tokenized
Credit Ecosystems

Bakersfield, California, United States

Summary

Strategic Trust Administrator | Private Banker | Financial Sovereignty
Advocate

As Trustee and Authorized Representative for the GM Family Trust, I specialize in lawful trust administration, private asset management, and advanced financial remedies rooted in both statutory compliance and common law principles. My work bridges public-facing operations with private trust performance — ensuring every move aligns with equity, contract law, and lawful remedy.

Over the years, I've developed a deep understanding of trust law, negotiable instruments, credit-based finance, and the lawful discharge of debt using compliant fiduciary strategies. This includes a mastery of UCC filings, IRS trust forms (1099-A/C, 56, 1041), and the proper handling of En Legis entities and taxpayer positions to restore power back to the people.

Through the SOVR Empire and its digital financial infrastructure, I am leading innovation in how communities interact with finance, offering tools that return control to the rightful holders of credit. From decentralized vaults to asset-backed lending systems, I build bridges between private trust protections and modern digital finance.

I believe in lawful remedy, financial literacy, and access to capital without compromise. My role is not just to manage — it's to educate, liberate, and elevate.

Experience

SOVR Empire / SOVR Development Holdings, LLC

Founder & Vision Architect

January 2024 - Present (2 years 3 months)

Bakersfield, California, United States

- Creator of the SOVR Wallet: a trust-backed financial interface blending blockchain, real-time payments, and trust law
- Designed and launched the Vault system: smart contract-secured instruments and tokenized asset ledger
- Built compliance documents, smart contract infrastructure, and UCC-aligned trust tech
- Currently leading private beta testing and sovereign finance integrations

GM Consul., Inc.

Maldonado, EL Trustee, for the GM Family Trust

October 2022 - Present (3 years 6 months)

Bakersfield, California, United States

Maldonado EL Trustee for the GM Family Trust, official representative of the GM Family Trust on behalf of Gustavo Orona Maldonado Trust, and Private Banker, Authorized Representative. Operating in the Public, Living in the Private. Learn the Power of "The Tax Payer" and how to use your issued En Legis.

Ignorance of the Law is No Excuse!

We Must take time to Over stand on Equity Maximum Principles, only then can we ALL have Peace and prosperity! Standing on Principles establishing community Enrichment, Leaving the gift of knowledge and Over standing that "It's All Business, Nothing Personal..!"

CARV

Senior Piping Designer

February 2023 - December 2023 (11 months)

Bakersfield

Parsons Corporation

4 years 11 months

Design Specialist / Senior Designer

January 2020 - October 2021 (1 year 10 months)

Bakersfield, California, United States

New assignment utilizing Aveva E3d to back model SoCal Leases though Point cloud scans provided.

Worked in a remote environment communicating though Microsoft Teams to interface with project team.

Extent of E3D Utilized 50+ hours weekly:

- Created Equipment
- Ran existing and new piping
- Modeled foundations & Trenches
- Modeled all Structures & Buildings
- Globally modified Attributes

Assisted Team members in best design practice to utilize software to the best of their ability.

Senior Designer

December 2016 - December 2019 (3 years 1 month)

Bakersfield, California Area

Assisted in the Development of a New Engineering and Design Facility in West Texas

Utilized AutoCAD Plant 3D to Generate Standardize Centralized Tank Batteries and Compressor

Stations for Chevron in Midland Tx with minimal Directive.

Performed Software Training for all New Hires on AP3D, Revu Bluebeam, Microsoft Office Suite

Managed Multiple Projects with transparency on One Note and Linked complete office to all documented spreadsheets.

Interfaced Directly with the client on a daily basis to facilitate their every request and needs.

Generated Standardized Equipment Models and Skids to simplify the facility Expansion and

Addition request for the Master Yearly Facility Designs.

Generated AP3D Specs Per the Customers Directive to utilize in Facility Models

Primary Modeler for the Midland Division, Generated AP3D Project Manager Setups

Provided field sketches, pipe routing, and generated isometric drawings for piping design

Modifying red lines (mark-ups) on drawings

Generated Complete turnover Packages for Client Reviews, Cover sheets, Drawing Indexes, Process

Packages, Mechanical Packages, Structural Packages, and Civil Packages to be issue for

approval/construction

REECE AND SONS CONSTRUCTION COMPANY

AutoCAD Specialist / Project Estimator

October 2014 - December 2016 (2 years 3 months)

Bakersfield, California, United States

- # Shop Designer with all duties to Design and Detail all Fabrication Drawings.
- # As-Built Layouts for Plot Plans submitted to County for Site Plan work.
- # Detailed Equipment for Reece Crane Service's for Crane Up-grades.
- # Handled Project Estimations, Procurement and Overseen Project Construction.

TJ Cross Engineers, Inc.

Piping Designer / Senior Designer Duties

August 2014 - January 2016 (1 year 6 months)

- # Mechanical Piping Designer with the duties of a Senior Designer
- # Involved in The design of multiple Steam, Oil, Gas and Water Projects
- # Front-end engineering P&ID development
- # Aided in the design of Steam Flood Pilots, Steam Injector's & Production Line's complete packages, Testing Sites with Manifolds Expansions
- # On-Plot & Off-plot Routings, Water Plant Upgrades
- # AWT's, Casing Vapor Recovery Units.
- # Prepared Fabrication and Piping drawings and Plot plans in 3D Models for Customer review, then convert them to 2D detailed drawings for client turnover.
- # Created Isometrics through CadWorks Isogen for Contractor to Fabricate
- # Extremely excelled in AutoCAD & CadWorks or AutoCAD Plant 3D.
- # Plant 3D is a lot faster for 3D Piping but Can use AutoCAD just as fast.
- # Involved with helping anyone in need of AutoCAD Assistance or efficiency pointers.

Construction Specialty Services, LLC

Facilities Manufacturing & Fabrication Process Designer

January 2012 - January 2016 (4 years 1 month)

- # ASME Pressure Vessel Designer detailing for fabrication
- # Involved in the design of multiple Steam, Oil, Gas and Water Projects
- # Front-end engineering P&ID development
- # Detailed studies and prepared cost estimate drawings before commencing detailed design.
- # Created 3D Model for customer review, and aided in the design of Steam Generators, Steam Injectors, 3-Phase Separators complete packages,

Selection Manifolds, FWKO, H2S Scrubbers, AWT's, Amine Contactor Tower's, Heat Exchangers and Fire Tubes Steam Blow down.
Prepared Fabrication and Piping drawings and Plot plans in 3D Models, then convert them to 2D detailed drawings for client turnover.

Cameron

Manufacturing Process Designer

November 2008 - January 2012 (3 years 3 months)

ASME Pressure Vessel Designer detailing for fabrication, process equipment 3D presentations

Material list, participated in reviewing calculations under the supervision of the project engineer

Interacted with shop welders to provide technical support during the fabrication and construction of process equipment such as, Gas Scrubbers, Amine Contactor Towers, 3-Phase Separators and AWT's.

Timely efficient and cost conscious.

Processes Unlimited International Inc.

AutoCAD Drafter Level III

April 2006 - May 2008 (2 years 2 months)

Mechanical drafter for team designers. Created piping isometrics, P&ID's, PDF's, tank appurtenances, and piping layouts. Prepared project drawing packages for clients in most efficient timing. Worked on projects mainly for Kern Chevron and Aera Energy oil company in Bakersfield, CA.

Education

School: "Private Legal Research Academy (Self-Led)"

Autodidact / Independent Sovereign Study, Focused on UCC, equity law, blockchain, and financial system architecture · (January 2024)

Bakersfield College
